

GUARROCASAS

Bosques Sostenibles certifies that:

In Guarro Casas' name, it has planted 158 trees in the Natural Park of Montgrí, Torroella de Montgrí (Girona – Spain).

These trees will absorb 45,82MT of CO2 in regards to the 2020 production of the Greenluxe PCW50 and PCW100 ranges. This quantity is estimated for a 40-year period, according to the data included in the Registry, Compensation and Absorption projects of CO2 from the Ecological Transition Ministry.

Hereby we accredit and appreciate their commitment to the fight against climate change.
